Subject Matter Expert for

Agenda

- Organizational challenges and stakeholders
- Benefits of a common IPS repository
- Increase the efficiency in creation of TechDoc
- Change- and Configuration Management
- Tagging-Guideline and Writing-Procedures
- Challenges during implementation
- Real world examples

Organizational challenges and stakeholders

Organizational challenges and stakeholders

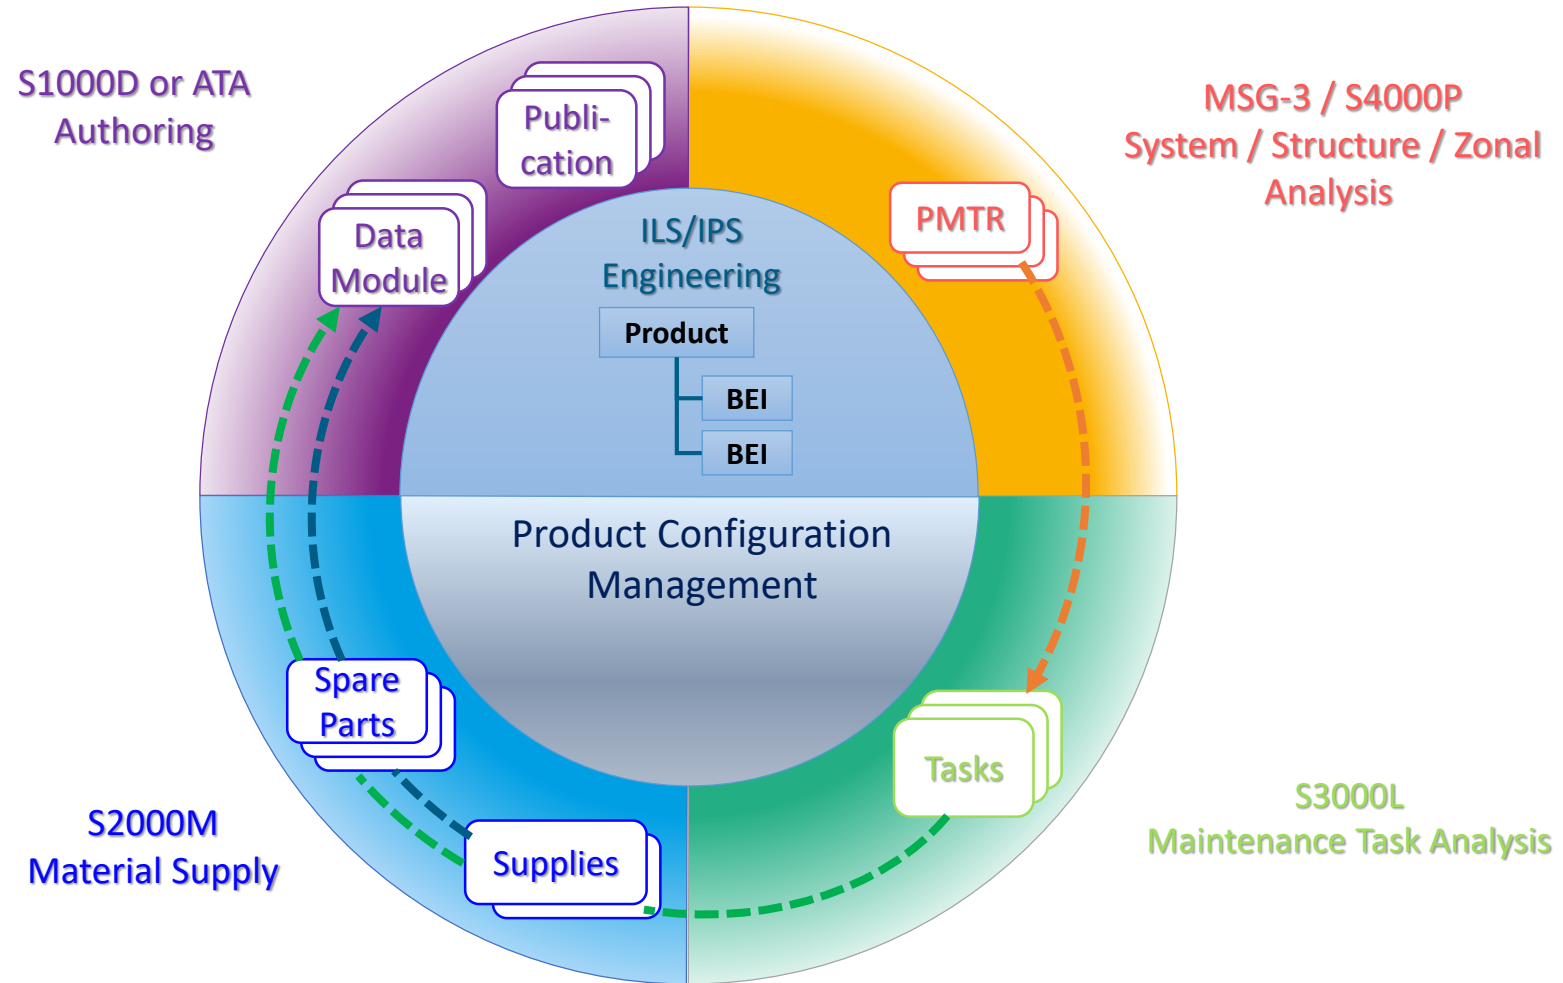

This document and its content is the property of the S1000D Council. It shall not be communicated to any third party without the owner's written consent. © All rights reserved.

Additional Challenges

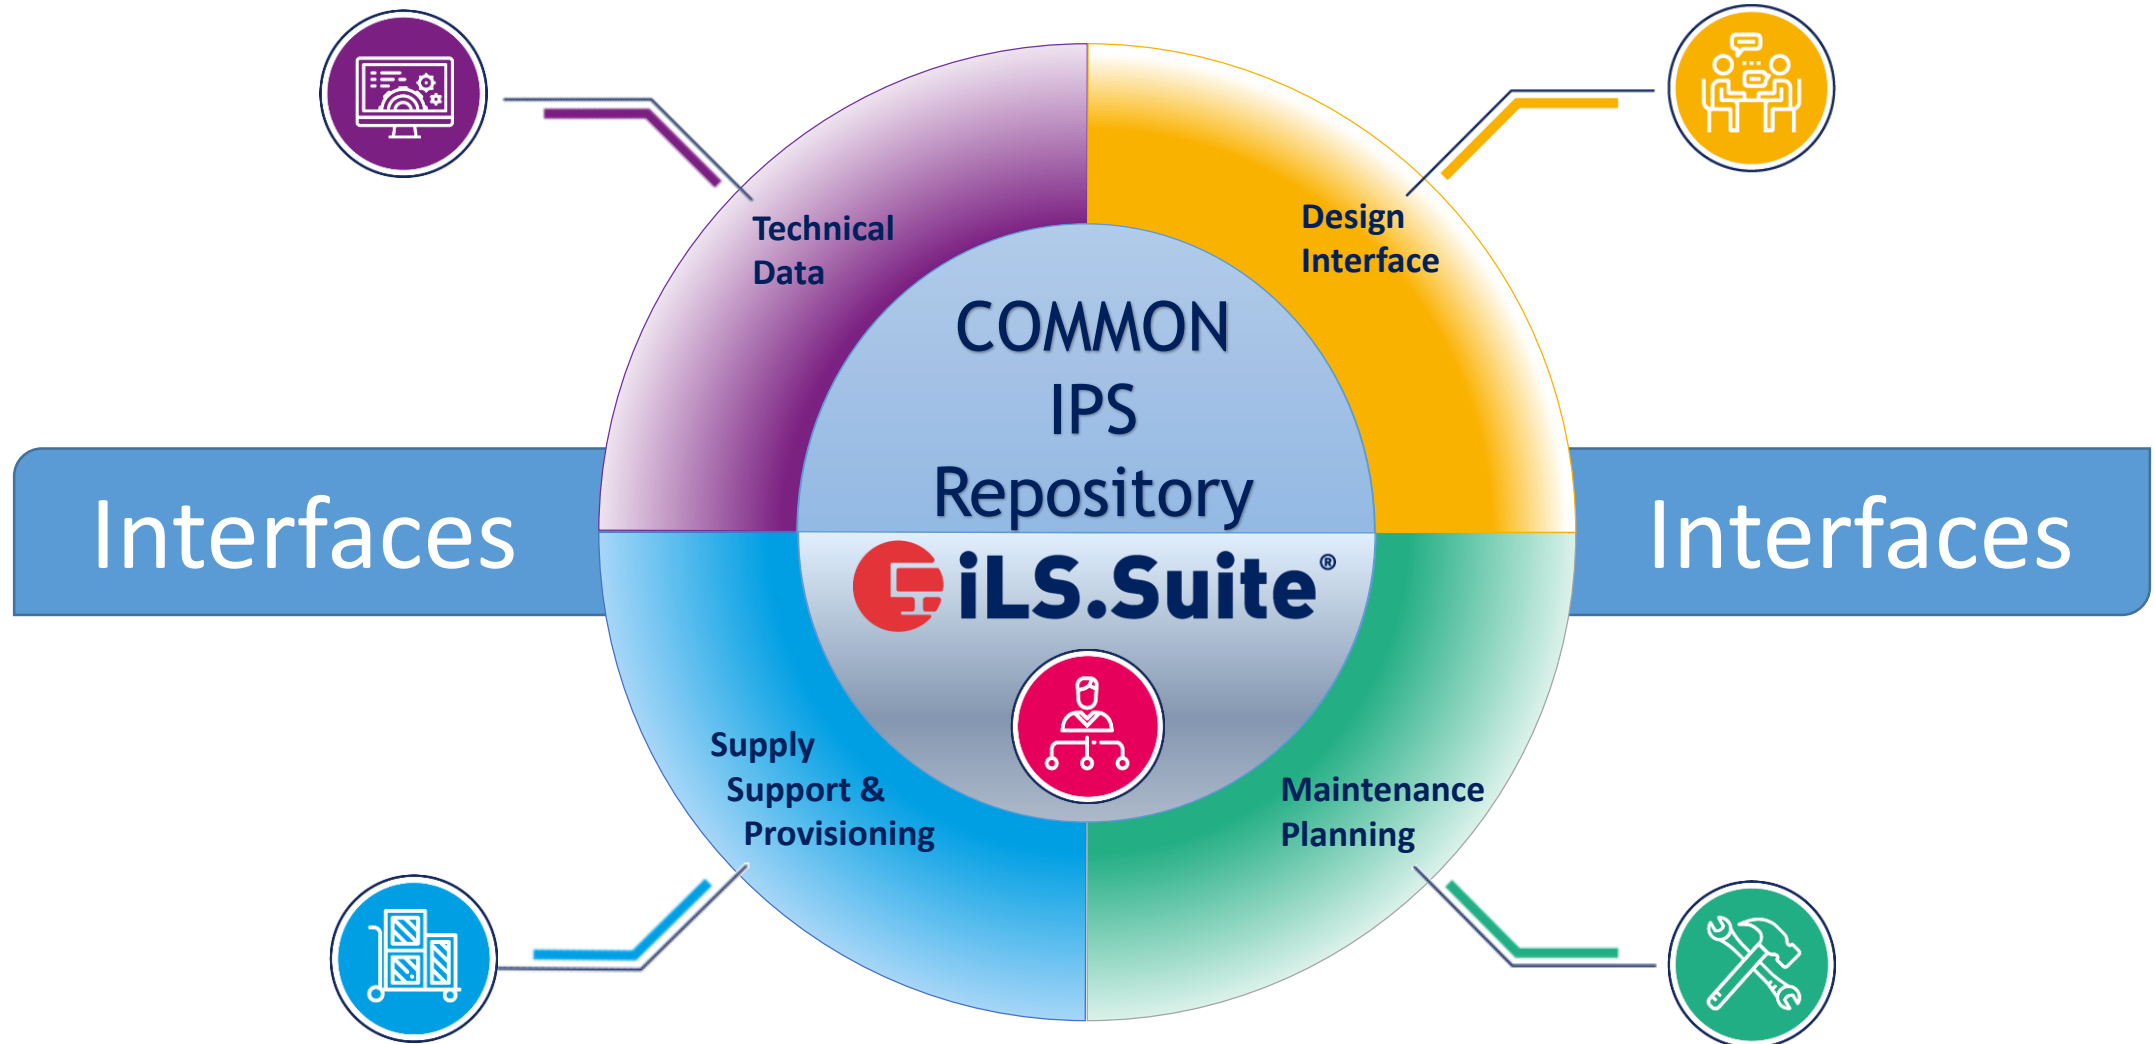

- Mixed fleets and operators
- Different TechDoc-Standard (S1000D and ATA) & project rules
- Civil and military projects
- Mixed toolset and IT-systems
- Many interfaces for data interchange
- Loss of data or rewrite of data
- No single point of contact for technical issues
- Different publishing solutions

Benefits of a common IPS repository

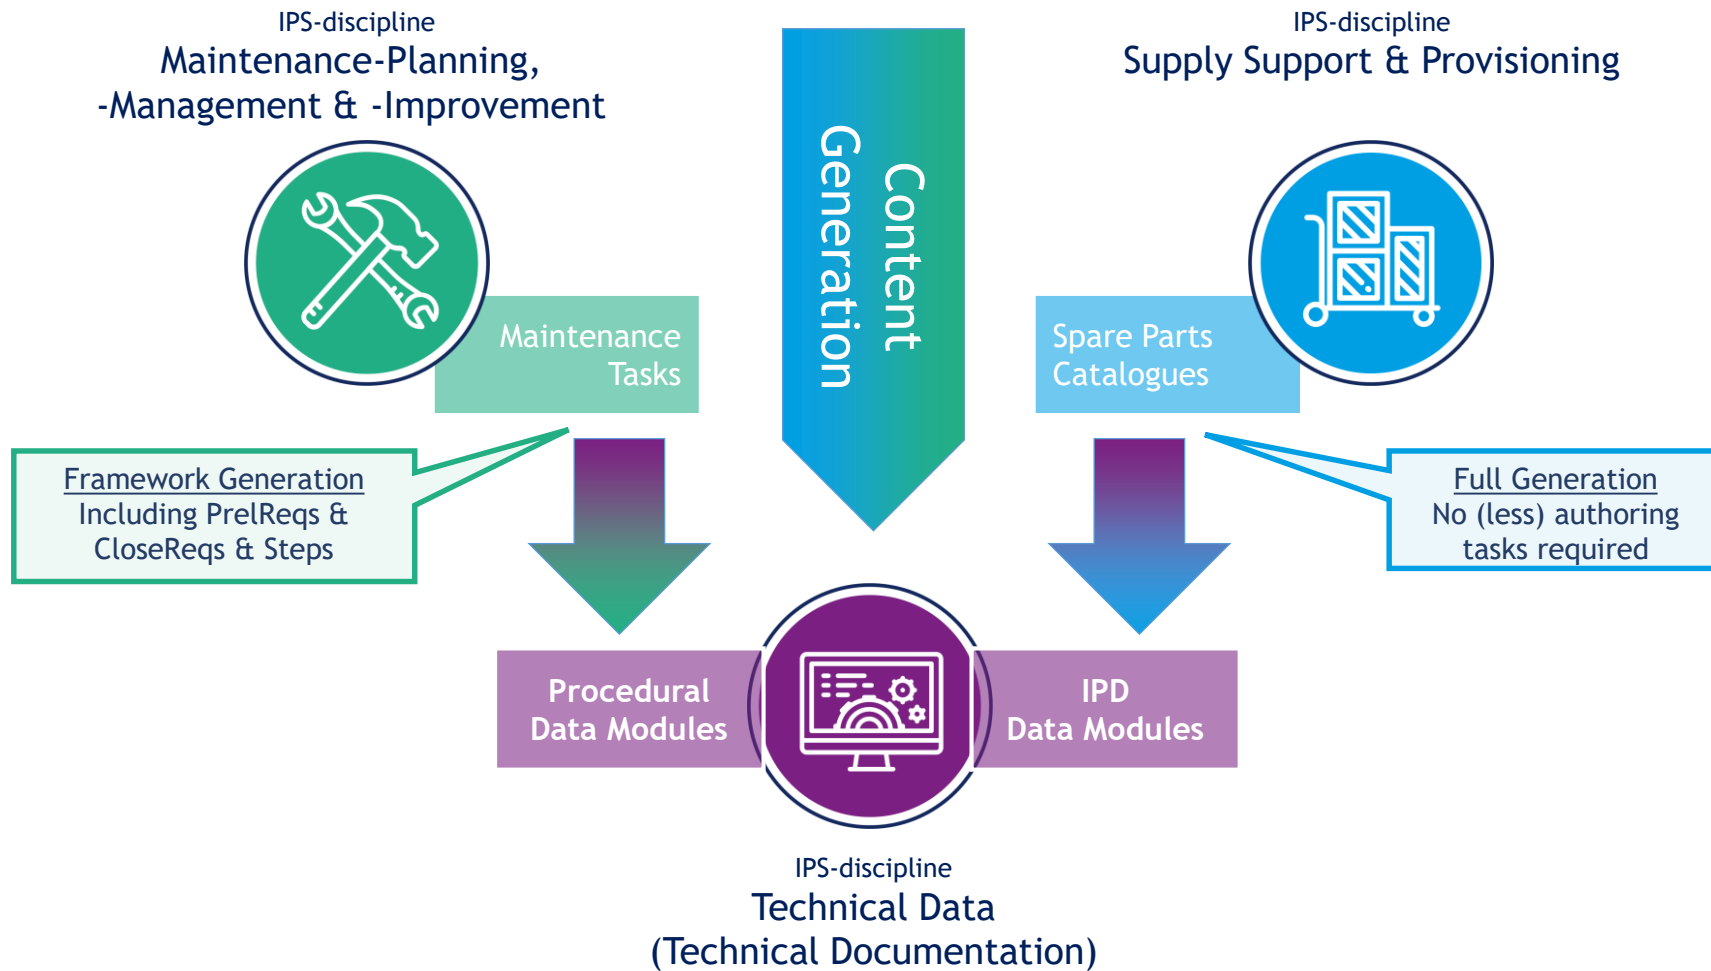

This document and its content is the property of the S1000D Council. It shall not be communicated to any third party without the owner's written consent. © All rights reserved.

Benefits of a common IPS repository

Increase in efficiency in creation of TechDoc

Benefits

- Reuse of independently written Tasks / IPLs
- Generation of Procedure-/Task and IPD/IPL data modules
- Flexible data mapping with project or install location specific values
- Reuse of centralized material (spares, supplies or equipment)
- Automatic linking to other Tasks / IPL
- Generation of Common Information Repository (CIR)
- Generation of Maintenance Schedule data modules
- Generation of ATA T-Files / S2000M CSNIP / UPIPCO / UPIPCT

Challenges during implementation

- Definition of independently Tasks / IPLs
- Convincing the customer to create detailed guidelines
- Generation scripts and data mapping
- Project- / Install-Location specific characteristics
- Shift of work - less work for Authors – more for engineers
- Who is responsible for warning, caution & notes
- And many more 😊
